Nagpur, India | (+91)8698850053 | pranavbuddhe2003@gmail.com | [LinkedIn](#) | [GitHub](#) |

Hi, I'm a Junior Software Developer with 1.5 + years of experience working on websites and applications. I've worked with HTML, CSS, JavaScript, React, PHP/Laravel, and Java. I enjoy solving real problems, writing clean and easy-to-understand code, and working together with teams to build helpful, user-friendly software. I'm always curious to learn new tools and technologies so I can grow as a developer and build better, faster solutions.

SKILLS & OTHERS

Front-end Technologies:

HTML5, CSS3, JavaScript, Bootstrap, ReactJs.

Back-End Technologies:

PHP, Laravel, SQL.

Programming Languages:

C, C++, Java, python

Other Technologies:

Github, Netlify, chatgpt.

EDUCATION

Course: B.SC (2020 – 2023) | 6.4 CGPA

Kamla Neharu Mahavidyalaya, Nagpur,
Maharashtra, India.

Course: XII (HSC) 2018 - 2020 | 58.15%

Vidarbha Buniyadi Jr. College, Nagpur,
Maharashtra, India.

Course: X (SSC) 2018 – 2020 | 80.20%

Sanjuba High School, Nagpur,
Maharashtra, India.

EXPERIENCE

Steps Technology | Jr. Software Developer | Nagpur, India

June 2024 – Present

I've gained practical experience in both front-end and back-end web development. On the front end, I've worked with HTML5, CSS3, Bootstrap 5, modern JavaScript (ES6+), DOM manipulation, and React — including advanced concepts in React.js.

On the back end, I've worked with Python, PHP, Laravel, SQL, SQLite, PostgreSQL, REST APIs, and user authentication. I've built projects where I applied these technologies to create and improve web applications. I also worked as part of a team to develop and test new features, fix bugs, and make the code more efficient and reliable..

Web Developer | Intern | Steps Technology | Haryana, India

Nov 2023 – May 2024

Acquired hands-on experience in web development using modern technologies. On the front end, I worked with HTML, CSS, and JavaScript. For the back end, I used Firebase to manage real-time databases and handle user authentication. I applied these skills to build and improve web applications, focusing on smooth data handling and secure user login using Firebase services.

PROJECTS

- **Portfolio – [GitHub](#)**

I designed and built a responsive portfolio website using HTML, CSS, Bootstrap, and JavaScript. The site highlights my journey, skills, projects, and experience in Full Stack Web Development. I also added a fully working Dark Mode/Light Mode toggle to give it a modern and user-friendly look. This portfolio not only reflects my technical skills but also my attention to detail and passion for creating clean, visually appealing web interfaces.

- **Websites – [Live Demo](#)**

Designed & developed a fully functional dynamic website using PHP for server side scripting and implemented responsive UI with HTML,CSS, and bootstrap to ensure mobile compatibility & used Javascript for interactive and MYSQL for backend data storage and retrieval. Focused on user-friendly design, form validations, and data management with CRUD operations. Deployed the project on a live server for demonstration and testing.

- **Tic_Tac_Toe : [Live Demo](#)**

I created a Tic Tac Toe game using HTML, CSS, and JavaScript. The game allows two players to take turns and checks for a winner or draw after each move. It features a clean, responsive layout and interactive gameplay with instant feedback. This project helped me strengthen my understanding of DOM manipulation, event handling, and game logic in JavaScript.

Achievements

- Microsoft Fabric e-Certificate – Completed foundational training on data analytics and business intelligence.
- GitHub Copilot Certificate – Completed foundational training using AI-powered coding assistant in real-world projects.
- Information Security & Compliance Certificate – Learned core concepts of data protection, privacy, and industry regulations

Declarations

I hereby declare that all the information mentioned above are true and correct to the best of my knowledge.
